

# HOTFRIESCOIN

## THE WORLD'S FIRST STABLE PROGRESSIVE COIN

### LEGAL OPINION

To whom it may concern,

Hotfriescoin is a new asset class called **Stable Progressive coin**.

It has the same price stability of stablecoin (BUSD), but continuously increases in value as transaction ( buy or sell ) are happening and never decreases.

Yes, that sounds amazing, Hotfriescoin is so far the only currency in the world that only increases in value.

Hotfriescoin is built currently on top of the BUSD stablecoin. The difference is that users pay a small fee that goes to increase its value at each transaction ( buy or sell ).

Therefore, hotfriescoin fits the same legality of the BUSD stablecoin.

BUSD has been declared not a security in the jurisdiction in which it is authorized, the same goes for hotfriescoin .

We conclude the Asset class HOTFRIESCOIN STABLE PROGRESSIVE COIN is not a security.
